ADVANCE PLUS DRYER, SR-80 TP2 G PLUS

KEY FEATURES:

01.GREEN FLOW SYSTEM

To achieve maximum energy savings, we have created an air recirculation system that sends hot expelled air back into the drum. The ADVANCE PLUS range reuses hot air, reducing the maximum drying cycle time and energy consumption.

02. TOTAL FLOW

An innovative and optimised mixed airflow for Advance Plus dryers. The standard axial-radial airflow (mixed flow) is complemented by additional openings to optimised the air circuit and reach maximum efficiency.

03.DOUBLE SKIN

Double skin and a double-glazed door that provide a complete thermal insulation of the machine for improved energy efficiency.

OPL <--> SELF-SERVICE

The machines can be converted from OPL to Selfservice and vice versa from the TP2 control.

- Green flow system: air recirculation system that allows air to be reused for greater energy savings and improved airflow.
- iDry System (Intelligent moisture sensor + temperature control at the drum entrance).
- Double skin that provides thermal insulation for the best possible energy efficiency.
- Fully Programmable Touch Plus Control Processor (TP2) with 7" touchscreen.
- External steel casing with grey coating (skinplate), stainless steel, easy to clean finish.
- Stainless steel drum.
- Total Flow: Optimised axial-radial airflow.
- Drum with stamped perforations to guarantee the gentle treatment of fabrics.
- Lint filter at the bottom, more ergonomic, larger and improved airflow.
- Automatic reverse rotation of the drum.
- Frequency inverter for smoother operation.
- Double-glazed door with a large opening.
- Anti-wrinkle system.
- End of cycle tone.
- Emergency stop button and security micro magnet to stop operation.
- Fire Kare System (Integrated fire prevention system).
- Pulley and Poly-V belt transmission system with the drum supported on wheels

OPTIONS:

- Reverse opening door.
- Stainless steel casing.
- Stainless steel front.
- Wooden packaging.
- Air intake filter. - Fluff filter.
